

Rondish

The Wireless Security System

A fully integrated estate security system using a wired backbone with wireless sensors. No conduit or cables required inside the flats.

The **Wireless Security System** is an engineering breakthrough in the flexible provision of building, estate or campus security networks, applying radio like never before, to give

- Major cost saving compared to wired alternatives
- Quick installation and much less building work and redecoration
- Proven technology - over twenty similar projects, more than 5000 units already installed in HK
- Integration with CCTV surveillance including motion detection and auto pan-and-tilt
- Integration with infra-red detector, smoke detector, door contact, access control, telephone door entry system, car barrier with database, and many others
- Calls can be sent to display panel, printer/database, and pager

Rondish is the agent for the European market leader for advanced **CCTV** product such as multiplexers, day/night cameras, digital recorder, and digital network systems, able to

- Integrate with security system to ensure guard has correct pictures to view and optimum recording is obtained
- Detect intrusion with motion sensing
- Speed up the recorder in event of intrusion to improve picture quality
- Link to other sites using telephone or microwave
- Digital recording up to 1 month with easy storage to disc
- Give clear high resolution pictures
- High quality, reliable products at reasonable prices

The **Rondish telephone door system** has been installed in over 100 blocks in Hong Kong, including the police residential quarters. The system is simple to use and very reliable.

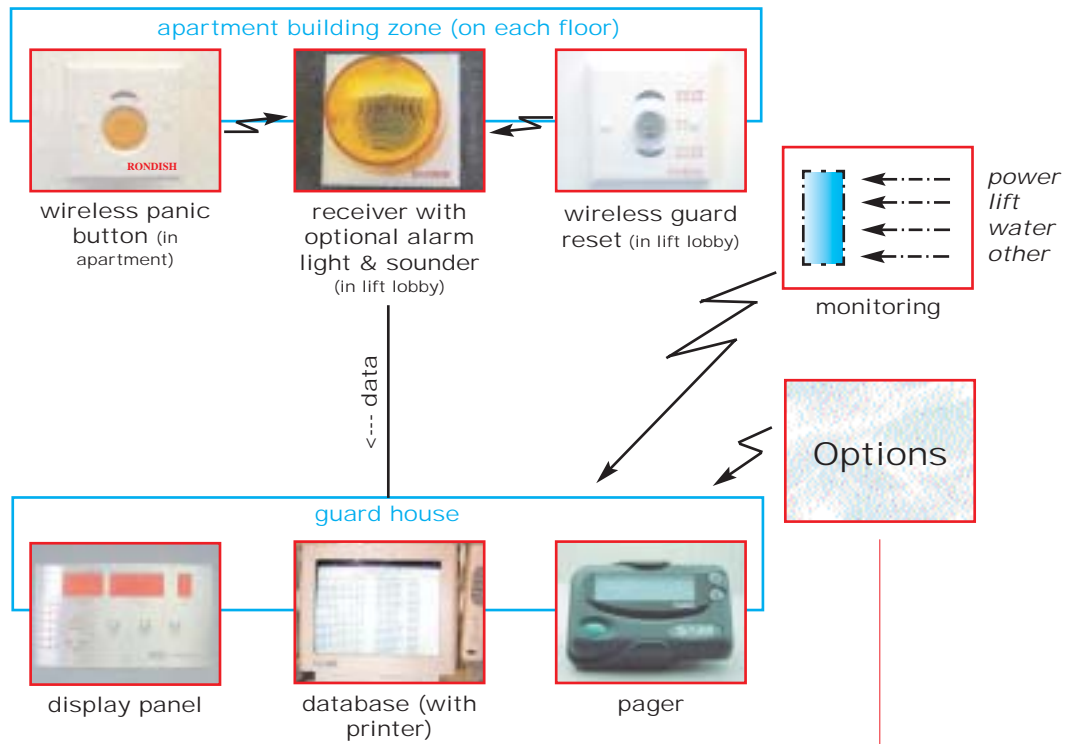

Wireless Security System

Rondish

Simple operation

1. Press the panic button
2. The alarm light will flash and sound in lift lobby
3. Calls will be
 - i) sent to the display unit with location and caller ID shown
 - ii) logged via printer or PC with event/time/date stamp
 - iii) connected to pager carried by guards
4. CCTV automatically switches to correct picture
5. The guards have to go to the area to reset alarm

When the power, lift, water, and other units are out of order, the message will be sent to the display panel, printer, database, and pager.

About Rondish

Market leader in wired and wireless security systems in Hong Kong with over 5000 users.

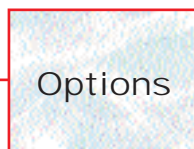

As design engineers at Rondish, we can quickly analyze the problems of our clients and adapt a unique solution to meet their needs and requirements. Our highly-skilled team of technicians and engineers will provide the support you would expect from a market leader. If you need an innovative approach and professional service, please call our sales engineers on 852-2865-0557. A demonstration can be arranged at your premises.
