

Portable IT Nurse Call System

Design For Beds Overflow

- A simple but professional IT-based wireless nurse call system. Suitable for hospital wards and care homes
- A powerful wireless nurse call point with long range signal transmission to the nurse station
- Completely portable makes it an easy solution for beds overflow with no installation or cabling required
- A wireless multi-color light provides audible and visual alarm. It is also a signal extender
- Event reports available for ward management
- In line with international standard for nurse call
- Low battery indication for devices
- Out of range / faulty indication if devices are inoperable (fully supervised)
- Totally wireless and flexible
- Easy to install and maintain
- Affordable and cost-effective
